

Eczema Care Online is a research project that aims to help people self-manage their eczema. We have reviewed the published evidence about safety and effectiveness of topical corticosteroids. Now we need your views to make the findings fit for use in Secondary Care.

Are you a Dermatologist or Dermatology nurse in the UK?

Join our online stakeholder event 'Mobilising Knowledge – the Secondary Care Perspective'
Friday 19th March (12:30-2:00)
to shape how we translate the evidence into practice.

Email linda.pycroft@nottingham.ac.uk to sign up!
